TOWN WARRANT

THE STATE OF NEW HAMPSHIRE

THE POLLS WILL BE OPEN FROM 10:00AM TO 8:00PM.

To the Inhabitants of the Town of New Ipswich in the County of Hillsborough in said State, qualified to vote in Town Affairs:

You are hereby notified to meet at Mascenic Regional School in said New Ipswich on Tuesday, the eighth day of March, next at 10:00 of the clock in the forenoon, to act upon the following subjects:

* 1) To choose all necessary Town Officers for the year ensuing.

* By Ballot:

Are you in favor of the adoption of the "Building Code as proposed by the Planning Board," a copy of which is attached hereto, and incorporated in. See attachment. (Submitted by the Planning Board)

* By Ballot:

To see if the Town will vote to adopt the Town Manager plan provided in Chapter 37 of the Revised Statutes Annotated. (By Petition)

The Town Meeting will be adjourned until Saturday, the twelfth (12th) day of March, 1988 at 10:00 of the Clock in the morning to act upon the remaining articles.

2) To raise such sums of money as may be necessary to defray Town charges for the ensuing year and make appropriations of the same. The budget for the ensuing year is \$ 932,336.20.

3) To see if the Town will vote to raise and appropriate the sum of forty thousand dollars (\$40,000.00) for the purpose of re-sealing Town roads, or take any other action relating thereto. (Submitted by Selectmen)

4) To see if the Town will vote to raise and appropriate the sum of twenty nine thousand dollars (\$29,000.00) to be transfered out as payments to the Capital Reserve Accounts as follows, or take any other action relating thereto. (Submitted by Selectmen)

HIGHWAY TRUCK	\$ 10,000.00
POLICE CRUISER	6,000.00
POOL EQUIPMENT	3,000.00
FIRE TRUCK	10,000.00
	<hr/>
	\$ 29,000.00

5) To see if the Town will vote to raise and appropriate the sum of twenty thousand dollars(20,000.00) for the 1988 salary, benefits, and expenses for a Town Manager, or act in any way relating thereto.(Submitted by Selectmen)

6) To see if the Town will vote to authorize the Selectmen and the Town Treasurer to borrow money in anticipation of the collection of taxes for the current municipal year, and to issue the same and on the credit of the Town, negotiable notes therefore, said notes and interest to be repaid in the current municipal year, or take any other action relating thereto.(Submitted by the Selectmen)

7) To see if the Town will vote to raise and appropriate the sum of two thousand seven hundred twenty one dollars and 60 cents(\$2,721.60.) to support the Monadnock Family and Mental Health Service, or take any action relating thereto.(Submitted by the Selectmen)

8) To see if the Town will vote to raise and appropriate the sum of eighteen thousand dollars(\$18,000.00) for the purpose of hiring two(2) full time police officers, or take any other action relating thereto.(Submitted by Petition)

9) To see if the Town will raise and appropriate the sum of fifteen thousand dollars(\$15,000.00) for the purpose of constructing and instituting a voluntary recycling center at the New Ipswich Sanitary Landfill, or take any other action relating thereto. (Submitted by Selectmen)

10) Shall we adopt the provisions of RSA 80:58-86 for a real estate tax lien procedure? These statutes provide that tax sales to private individuals for nonpayment of property taxes on real estate are replaced with a real estate tax lien procedure under which only a municipality or county where the property is located or the state may acquire a tax lien against land and buildings for unpaid taxes.(Submitted by Petition)

11) To see if the Town will vote to raise and appropriate the sum of sixty thousand dollars(\$60,000.00) to have the Town re-evaluated by the State of New Hampshire or by a professional appraisal company, or take any other action thereon.(Submitted by the Assessors)

12) To see if the Town will vote to close, subject to Gates and Bars, the following roads or take any action thereto:

1) From Page Hill Road to house owned by Jean and Kyra Montague--1904 feet. (Niemi Road)

2) From Page Hill Road to house owned by Isaac Traffie--1353 feet. (Page Court)

3) From Poor Farm Road to house owned by Vernon and Kleta Dudley--1002 feet.(Robbins Road)

4) From Smithville Road circling to a point on Goen Road--421 feet. (Hildreth Place)

5) From Davisvillage Road to house owned by Martha Kesti--682 feet. (Kesti Road)

13) To see if the Town will direct the Conservation Commission to disallow hunting from any land leased from the State of New Hampshire, or to be leased, adjacent to flood control Dam Sites #14, Thayer Road and #35, Old Rindge Road, for which the authority to lease was granted under Articles #24 and #25 at the 1987 Town Meeting. (Submitted by Petition)

14) To see if the Town will accept the management plan for the three dam sites described in "Report to the Town" by the Conservation Commission as requested at the 1987 Town Meeting, Articles 23, 24, and 25. This report describes the management plans for each of the three dam sites as required in the lease agreements with the Water Resources Board. (Submitted by Conservation Commission)

15) To see if the Town will authorize the Selectmen to accept private donations of land, interest in land, or money to be deposited into the Conservation Fund, for the purposes of contributing to the local matching portion required for acquisition and related costs of the fee or lesser interest in Potter property on Country Road, assessors lot #48, tax map #16B, for permanent conservation use under the N.H. Land Conservation Investment Program (LCIP) RSA 221-A, and to authorize the Selectmen to apply for and accept the State matching funds under the LCIP for these purposes. Said donated funds and State matching funds may be expended by majority vote of the Conservation Commission. (Submitted by the Conservation Commission)

16) To see if the Town will vote to raise and appropriate the sum of \$1,000.00 to the Conservation Fund as authorized by RSA 31-A:5 and authorize the Selectmen to accept private donations of land, interest in land, or money to be deposited into the Conservation Fund for the purposes of contributing to the local matching portion required for acquiring conservation land or interest in land and other costs associated therewith for permanent conservation use under the N.H. Land Conservation Investment Program (LCIP) RSA 221-A, and authorize the Selectmen to apply for and accept the State matching funds under the LCIP for the purposes of acquisition of the fee or lesser interest in conservation land. Said appropriated or donated funds and State matching funds may be expended by majority vote of the Conservation Commission. (Submitted by the Conservation Commission)

17) To see if the Town will vote to raise and appropriate the sum of nineteen thousand dollars (\$19,000.00) for the acquisition of and to equip a one ton dump truck, and to further authorize the Selectmen to withdraw that amount from the Capital Reserve Fund for that purpose, or take any other action relating thereto. (Submitted by Highway Department)

18) To see if the Town will vote to raise and appropriate the sum of fifteen thousand dollars(\$15,000.00) for the hiring of a part time Code Enforcement Officer(Building Inspector) for the Building Code as proposed by the Planning Board, or take any other action relating thereto.(Submitted by Selectmen)

19) To see if the Town will vote to raise and appropriate twelve thousand dollars(\$12,000.00) for the purchase of a computer and accessories for the Police Department, or take any other action relating thereto. (Submitted by Police Department)

20) To see if the Town will vote to raise and appropriate twenty thousand dollars(\$20,000.00) for the purpose of equipping the pumper/tanker and to authorize the withdrawal of \$12,500.00 from the Capital Reserve fund established for this purpose, or take any other action thereon.(Submitted by Fire Department)

21) To see if the Town will raise and appropriate the sum of five hundred dollars(\$500.00) for working expense for a three member Town Municipal Building Study Committee for the purpose of reviewing the space needs of the Police Department and all Town Offices and Boards and to authorize the Board of Selectmen to appoint this committee with a report due September 30, 1988, or take any other action thereon.(Submitted by the Selectmen)

22) To see if the Town will vote to raise and appropriate one thousand dollars(\$1,000.00) for the purpose of renovations to the Town Office Building and to authorize a withdrawal in this amount from the Revenue Sharing Fund, or take any other action relating thereto.(Submitted by Selectmen)

23) To see if the Town will vote to designate Old Country Road(From River Road to the Ford/Cohen Boundry Line) as a scenic road in accordance with RSA 231:157.(Submitted by Petition)

24) To see if the Town will vote to designate Currier Road from Route 123/124 to River Road, approximately one-third mile as a scenic road in accordance with RSA 231:157.(Submitted by Petition)

25) To see if the Town will vote to authorize the Selectmen to apply for and accept any Federal and State Grants available in 1988 and to further authorize the Selectmen to expend the funds for the purpose stated, or take any other action relating thereto.(Submitted by Selectmen)

26) To see if the Town will vote to accept any and all gifts, legacies and devices, made to them during the year for care and maintenance of the Town Cemeteries, or take any other action relating thereto.(Submitted by Selectmen)

Given under our hands and seal, this fifteenth day
of February, in the year of our Lord, nineteen hundred and
eighty eight. (February 15, 1988)

Article 9. Affirmative vote to authorize the withdrawal from the Revenue Sharing Fund as an offset to the Highway Department budget in the amount of \$5,581.47.

Article 10. Affirmative vote to raise and appropriate the sum of \$40,000.00 for the purpose of re-building and/or re-sealing Town roads.

Article 11. Affirmative vote as amended to raise and appropriate the sum of \$26,001.00 to be applied to the Capital Reserve Accounts as follows: Fire Truck \$10,000.00, Highway Truck \$10,000.00, Police Cruiser \$6,000.00, Pool Equipment \$1.00.

Article 12. This article was not passed.
116 No votes 77 Yes votes

Article 13. Affirmative vote to authorize the Town not to assess, levy, and collect resident tax.

Article 14. Affirmative vote to authorize the Planning Board to prepare and amend a recommended program of Municipal Capital Improvement Projects, projected over a period of at least six years, pursuant to RSA 674:5.
66 Yes votes 34 No votes

Article 15. Affirmative vote to raise and appropriate a sum not to exceed \$3,000.00 for the study of, implementation of a recommended Program of Municipal Capital Improvements Projects as defined by RSA 674:5-8.
62 Yes votes 42 No votes

Article 16. Affirmative vote to authorize the Planning Board to review and approve or disapprove site plans for the development of tracts for non-residential uses or for multi-family dwelling units, which are defined as any structures containing more than two dwelling units, whether or not such development includes a subdivision or resubdivision of the site, and to require the Town Clerk to file with the Hillsborough County Registry of Deeds a certificate of notice showing that the Planning Board has been so authorized, and giving the date of such authorization, pursuant to RSA 674:43.
58 Yes votes 26 No votes

Article 17. Affirmative vote to raise and appropriate the sum of \$1,941.60 to support the Monadnock Family and Mental Health Service.

Article 18. Affirmative vote to authorize the Selectmen and the Town Treasurer to borrow money in anticipation of the collection of taxes for the current municipal year and to issue the same and on the credit of the Town negotiable notes therefore, said notes and interest to be repaid in the

current municipal year from taxes collected during the current year.

Article 19. Affirmative vote to authorize the Selectmen to administer or dispose of any real estate acquired by the Town through Tax Collector's deed.

Article 20. Affirmative vote to hear and act upon the reports of the Selectmen, Town Clerk, Tax Collector, Overseer of Welfare and reports of all agents, committees, and officers heretofore chosen.

Article 21. Affirmative vote to authorize the Selectmen to apply for and accept any Federal and State grants available in 1987 and to further authorize the Selectmen to expend the funds for the purpose stated.

Article 22. Affirmative vote to authorize the Selectmen and Trustees of Trust Funds to accept any and all gifts, legacies and devices and to create trust funds for care and maintenance of the Town Cemeteries.

Article 23. Affirmative vote to read as amended to accept a lease agreement from the Water resources Board of the State of New Hampshire that the Town lease the two acres owned by the Water Resources Board at Dam Site #13, Temple Road, for 50 years, for a one dollar (\$1.00) fee. Protection and use of this land is to be the responsibility of the Conservation Commission in accordance with the terms of the lease agreement.

And that the Conservation Commission allow any license and accepted use such as but not limited to hunting, fishing, and trapping.

The Conservation Commission will prepare a report for the use and restriction on certain parcels brought before the townspeople at the next town meeting.

Article 24. Affirmative vote to read as amended to accept a lease agreement from the Water Resources Board of the State of New Hampshire, that the Town lease the thirty five acres owned by the Water resources Board at Dam Site #14, Thayer Road, for 50 years, for a one dollar (\$1.00) fee. Protection and use of this land is to be the responsibility of the Conservation Commission in accordance with the terms of the lease agreement.

And that the Conservation Commission allow any license and accepted use such as but not limited to hunting, fishing, and trapping.

The Conservation Commission will prepare a report for the use and restriction on certain parcels brought before the townspeople at the next town meeting.

Article 25. Affirmative vote to read as amended to accept a lease agreement from the Water Resources Board of the State of New Hampshire, that the Town lease the seventeen acres owned by the Water Resources Board at Dam Site #35, Old Rindge Road, for 50 years for a one dollar (\$1.00) fee. Protection and use of this land is to be the responsibility of the Conservation Commission in accordance with the terms

of the lease agreement.

And that the Conservation Commission allow any license and accepted use such as but not limited to hunting, fishing and trapping.

The Conservation Commission will prepare a report for the use and restriction on certain parcels brought before the townspeople at the next town meeting.

Article 26. Affirmative vote to accept three paintings by Mr. Laurence Ackerson:

1. Old Town Hall - Oil Painting
2. Winter Scene of Main Street - Water Color
3. Fall Scene of Main Street - Oil Painting

Article 27. Affirmative vote as amended to instruct the Town's representatives to the General Court to take all necessary measures to insure that no radio active waste shall be stored or disposed of within this Town of New Ipswich unless and until the proposed storage or disposal has been approved by the voters of the Town at the annual town meeting by ballot.

Article 28. This article to rescind Article #12. 1982 Town Report mandating semi-annual tax billing. Article did not pass.

SELECTMEN'S REPORT

As indicated by the reports of all departments and boards, 1987 continued the trend of our Town being one of the fastest growing Towns in New Hampshire. Needless to say, the demand placed on local government increased at such an alarming rate that additional employees were needed at the Town Office, Police Department, and Highway in order to satisfy taxpayers' needs. This trend did not slow down at the end of the year and will continue into 1988 and predictions are as long as the economy remains stable, New Ipswich will grow at an even faster rate.

With the passage of Article #8, a computer system was purchased and in house tax billing began with the December billing. This should result in a savings of time and money previously spent with individual outfits. Eventually, other items are to be added so that all budget and payroll figures will be readily available.

New vehicles were purchased for Police, Highway and the Fire Departments. Due to the fact that the figures used for the fire truck were too low to purchase and equip, an additional \$20,000.00 is being asked for March. The Fire Department did not have this information at the 1987 Town Meeting, so were not able to amend it.

In April, we were advised by Mr. Preston, owner of the landfill site, that the 138 acres of land was for sale. Since the agreement stated that New Ipswich had first option to purchase, a special Town Meeting was held on July 15th to raise \$212,500.00 for that purpose. Since opportunity only knocks once, the voters in attendance were overwhelmingly in favor of purchase. It was finalized in August. New Ipswich is the envy of many towns who wish that they could be in our position.

The Landfill survey, as mandated by the State, was not completed and you will notice that the budget request reflects this amount plus other needs for the area. Also requested is \$15,000.00 to construct buildings and institute a voluntary recycling program. The intent is to recycle as much as possible in paper, glass and plastics and branch out with other commodities such as aluminum as soon as feasible.

Throughout the year it became very apparent that the tax base absolutely has to increase. Our present equalization factor has been at *33% because of the numerous inflationary sale transactions. The Board of Selectmen and the Assessors feel that we must have a re-evaluation of our town to obtain true property values in our town. The \$60,000.00 asked in the article should be sufficient to achieve this.

After much discussion between Town Officials, it has become increasingly apparent that a municipal building is very much needed. We are asking to establish a fund for the purpose of consolidating the Police Department and all Town Offices into one. As everyone is aware, it is very hard to conduct official business in the Town Office at present.

The Board of Selectmen feel after many meetings in 1987 with school officials that the additional facilities are badly needed and you the taxpayer must decide in 1988 the course to be followed.

In the Spring of last year, flood damage wreaked havoc with some of our roads and would have caused a severe problem with our Highway budget had we not been eligible for emergency disaster funds. Consequently, the Town had to pay only 25% of the actual figure. We are still waiting to be reimbursed for the culvert work done on Fox Farm Road so this reimbursement is not reflected in the 1987 figures.

In summation, the past year was a continuation of the many challenges which our Town is facing in all areas. Through the cooperation of the taxpayers and Town officials, we hope to continue to try to find solutions and alleviate some of these challenges. It must be a cooperative effort. Suggestions and ideas are always needed. Please get involved in your Town's future.

We would like to express our thanks and appreciation to all Department Heads and Boards for their dedication in 1987. Special thanks must be given to Lucy Lemons, Marilyn Somero, and Cindy Morris at the Town Office in trying to provide the services needed to keep Town Government running as smoothly as possible.

Respectfully submitted,

George H. Lawrence, Chairman
Richard A. Hall
James E. Coffey

Board of Selectmen

NOTE* Our equalization figure has changed since this was written to 25%.

BOARD OF HEALTH

As in past years, the Selectmen acted also as the Board of Health.

Once again, pollution of public waters and drinking water was one of the major problems and hours were spent trying to reach solutions of the various complaints. As in past years, it much emphasized that most of the problem is caused by disregard for ones' property, neighbors and the environment in general.

Other areas where we were active again were kindergarten inspection and nursery schools. It must be noted that all facilities have to be inspected by the local Fire Department and Board of Health.

One major problem investigated and consuming much time was the presence of swarms of flies at one farm and odors, etc. at another. Unfortunately, we were not able to achieve a permanent solution regarding these complaints, even with the help of State and Federal agencies.

Once again, we were kept very well informed through the assistance of Dr. Robert Shaw and Representative Bonnie Packard.

Anyone needing assistance is urged to call the Town Office and hopefully we can solve the problem mutually.

Respectfully submitted,
Board of Health
George H. Lawrence
Richard A. Hall
James E. Coffey

SCHEDULE OF TOWN PROPERTY

As of December 31, 1987

TOWN HALL, LAND AND BUILDING	\$ 75,000.00
Furniture and Equipment	25,000.00
POLICE DEPARTMENT, LAND AND BUILDING	57,000.00
Equipment	40,000.00
Contents	11,500.00
FIRE DEPARTMENT, LAND AND BUILDING	100,000.00
Equipment	120,000.00
HIGHWAY DEPARTMENT, LAND AND BUILDING	54,700.00
Equipment	387,000.00
PARKS, COMMONS AND PLAYGROUNDS	102,400.00
SANITARY LANDFILL BUILDING	22,300.00
TOWN SALT SHED	3,000.00
OLD TOWN HALL	80,000.00

TOWN OF NEW IPSWICH

BUILDING CODE

Section 100 TITLE, CONSTRUCTION

This bylaw shall be known as the Building Code of the Town of New Ipswich, and it shall be construed to insure public safety, health and welfare insofar as they are affected by building construction through structural strength, adequate means of egress facilities, sanitary equipment, light and ventilation and fire safety; and in general to secure safety to life and property from all hazards incident to design, erection, removal, demolition or use and occupancy of buildings, structures or premises; the term "Town" wherever appearing herein shall refer to the Town of New Ipswich; the term "construction" shall include, but not be limited to, the erection, alteration, repair, renovation, demolition or removal of any building or structure.

Pursuant to RSA 156:4-a and RSA 156:4-6, the Zoning Board of Adjustment shall act as the Board of Appeals.

Section 101 MATTERS NOT PROVIDED FOR

Any requirement reasonably necessary for structural, fire or sanitary safety of an existing or proposed building or structure, or reasonably necessary for the safety of the occupants thereof, and which is not specifically covered by the Code, shall be determined by the Code Enforcement Officer.

Section 102 SCOPE

This Code shall govern the construction, alteration, addition, repair, demolition, removal, use, location, occupancy, and maintenance of all buildings and structures, and the standards of materials to be used in the construction, alteration and repair of any building or other structure specified in Section 103. Accessible sites, facilities and buildings that have been publicly funded shall provide accessible elements and spaces as set forth in "The Architectural Barrier Free Design Code for the State of New Hampshire".

Section 103 APPLICATION

This Code and the rules and regulations authorized for promulgation under the provisions of this Code shall apply to all buildings or other structures, either existing or proposed, which are located within the Town, except as such matters are otherwise governed by other ordinances or statutes.

Section 103.1 CONTINUATION OF EXISTING USE

The approved use or occupancy of any structure that is approved or existing on the date of adoption of this Code, shall be permitted to continue without change.

Section 104 APPOINTMENT OF THE CODE ENFORCEMENT OFFICER

The Selectmen shall, upon the effective date of this Code and annually in March thereafter, appoint a competent Code Enforcement Officer who shall hold office until his successor has been appointed and has qualified. The Code Enforcement Officer shall be an architect, a civil, structural or architectural engineer, a building contractor or a building mechanic. The term "Inspector" wherever appearing herein shall refer to the Code Enforcement Officer.

Section 105 REMOVAL

The Code Enforcement Officer shall not be removed from office except for cause and after full opportunity to be heard on specific and relevant charges by and before the Town Selectmen.

Section 106 COMPENSATION, CONFLICT OF INTEREST

The compensation of the Code Enforcement Officer shall be set forth in the Personnel Bylaw of the Town. No Code Enforcement Officer shall in any way be interested in the contract for labor upon, or materials or fixtures to be placed in any building or structure subject to his inspection.

Section 106.1

If there is a reasonable basis to believe that particular circumstances present a conflict of interest as described in Section 106, the Board of Selectmen shall appoint a deputy Code Enforcement Officer for the administration of this Code as is relevant to those particular circumstances, and such deputy Code Enforcement Officer shall have all the powers and authority of a Code Enforcement Officer.

Section 107 STRUCTURES AND ACTIVITIES FOR WHICH PERMITS ARE REQUIRED

Every person intending to construct, alter or demolish a structure or change the occupancy of any part of a building or structure or to change or alter the use of any part of any building or structure, shall, before proceeding with any work or modification for the purpose of effectuating construction, alteration or demolition, file a written application for a permit with the Inspector.

Section 108 REQUIREMENTS FOR APPLICATIONS FOR PERMITS

An application for a permit shall be on a form furnished by the Inspector. The application shall contain the following:

Section 108.1

A reasonable description of the building or structure, whether existing or proposed.

Section 108.2

A reasonable description of the location or proposed location of the building or structure; such location shall be referred to as the "operation site" or "proposed operation site".

Section 108.3

In the case of an addition to an existing building or structure, or the construction of an accessory building, where the addition or accessory building is subordinate in size and scope to the primary building, a sketch of the lot showing the size and location of the building(s) or structure(s) in relation thereto. In the case of a proposed building or structure, a plot plan certified to by a registered engineer or surveyor, showing the dimensions of the proposed new construction and existing and other proposed structures on the same lot.

Section 108.4

A reasonable description of the work to be done and the materials to be used therein; the work to be done may be referred to as the "operation" or the "proposed operation".

Section 108.5

A statement of the existing and proposed use and occupancy of all parts of the building or structure.

Section 108.6

Any additional information as may be required by the Code Enforcement Officer.

Section 109 FEES FOR PERMITS

A fee for each plan examination, building permit and inspection shall be recommended by the Code Enforcement Officer and be subject to approval by the Board of Selectmen after one (1) public hearing. The public notice shall be not less than fourteen (14) days nor more than thirty (30) days prior to the hearing.

Section 109.1

The current fee schedule shall be available in print upon written request of the applicant.

Section 110 TIME FOR REPORTS OR APPLICATIONS

The Inspector shall, within five (5) working days after receiving an application, issue or refuse the permit and notify the applicant in writing of his decision. The Board of Selectmen may, in special cases, when it deems it necessary in the best interests of the Town, extend this period of time for a period up to twenty (20) working days and so notify the applicant. If the Inspector refuses to issue a permit, written notification of his decision shall be delivered to the applicant in person or sent by registered or

certified mail to him at the address given in the application and shall set forth clearly and in detail all the reasons for such refusal.

Section 111. APPROVED PLANS

Section 111.1

Other than one and two-family dwellings and accessory buildings, all design work for new construction, alteration, repair, expansion, addition or modification work involving the practice of professional architecture or engineering as defined by the statutory requirements of the professional registration laws of the State of New Hampshire shall be prepared by registered architects or engineers.

Section 111.2

One (1) copy of the approved plans and specifications, together with a signed permit, shall be kept at the operation site until the operation is completed. After a permit has been issued, the approved plans and specifications shall not be altered unless the Inspector first approves any proposed change; any such proposed change shall be submitted in written form and shall contain a reasonable description of such change and shall set forth a reasonably sufficient statement of the reason for such change; the Inspector shall approve or refuse such change consistent with the provisions of Section 110 of this Code.

Section 111.3

The Inspector, in exercise of sound discretion, may waive the requirement for filing plans when the work involved is of a minor nature.

Section 112 CONTINUED VALIDITY OF A PERMIT

A permit shall be void if structural alteration construction or demolition is not commenced within ninety (90) days of its issue or if work is abandoned for more than six (6) consecutive months.

Section 113 INSPECTION; NOTICE TO THE INSPECTOR; CHECKLIST OF INSPECTIONS

The Inspector shall have the right, in the performance of his duties and at reasonable hours, to enter, examine and inspect any building operation. The Inspector shall also inspect each building under alteration or construction at each of the following stages: (1) before the foundation or footing forms are in place; (2) when the building is ready for insulation, or lath, after all rough plumbing and electrical work has been passed; and (3) upon completion of the alteration or construction before the building or structure is occupied. The builder in charge of construction shall notify the Inspector when each of the aforementioned stages has been reached as well as whenever any parts which will be concealed by further construction of the structure or building are ready for inspection. The Inspector shall make the inspection promptly after being notified and in no case shall he delay his inspection for more than forty-eight (48) hours, exclusive of Saturdays, Sundays and holidays. At the completion of each inspection, the Inspector shall submit to the builder, or post on the inspected premises, a copy of an updated checklist of inspection.

Section 114 ENFORCEMENT OF BUILDING CODE; STOP-WORK ORDERS

The Inspector shall enforce the regulations contained in this Code. He shall require that all workmanship and all building materials be of good quality and that the methods of construction comply with generally accepted standards of Engineering practice and not be inconsistent with law. In case of violation of this Code or in the event of noncompliance with plans and specifications approved hereunder, the Inspector shall, in writing, notify the builder or owner, or the representative of either, of such violation or noncompliance. Alternately, the Inspector may order the suspension of the work by issuing a stop-work order which shall state the conditions under which the work may be resumed. The stop-work order shall be sent to the owner, the builder or the representative of either. A copy of the order shall be posted at the site of the building operation, and it shall not be removed without the written approval of the Inspector. No oversight or neglect of duty on the part of the Inspector shall legalize the use, erection, demolition, alteration or occupancy of a building or structure, in a manner not in conformity with the provisions of this Code.

Section 115 VIOLATIONS AND PENALTIES

Whoever erects, alters, uses, occupies, maintains, demolishes, or moves any building or structure in violation of any provision of this Code or causes or permits any such violation to be committed shall be liable for a fine of not more than one hundred dollars (\$100.00) for each violation. Each day that a violation continues shall be deemed a separate offense. The fine will not be imposed if another penalty has been provided for the violation.

Section 116 ZONING BOARD OF ADJUSTMENT

If a person is aggrieved with a decision of the Inspector, he may within ten (10) working days of the date of said decision appeal to the Board of Adjustment. No member of the Board of Adjustment shall act in any case in which he is interested. In cases involving engineering problems, the Board may secure professional or expert assistance. Each decision of the Board shall be in writing.

Section 117 RECORDS

The Inspector shall keep at the Town Office a record on file of all material pertaining to permits issued or to be issued pursuant to this Code and submit a report to the Selectmen to be included in the Annual Town Report.

Section 118 CONSTRUCTION OF BUILDINGS

The Inspector may permit, on the basis of one or more duly authenticated reports from a Recognized Source or Sources, the use of new materials or models of construction, not provided for in this Code, and may, for the purpose of carrying out the intent of this Code, adopt accepted standards of materials or workmanship, of federal or state bureaus, national technical organizations or fire underwriters.

Section 119 EXCAVATIONS AND FOUNDATIONS

All structures and buildings hereafter erected or constructed shall have concrete footings and masonry or concrete foundations whenever footing(s) or foundation(s) are part of the construction operation. Footing for masonry walls shall be not less than eight (8) inches deep and not less than twenty (20) inches wide unless otherwise authorized or directed by the Inspector. All footings and/or foundations shall extend four (4) feet below finished grade and eight (8) inches above grade.

Section 119.1 FOUNDATIONS

Section 119.11 Dwellings

All dwellings hereafter erected or constructed shall have masonry or concrete foundations whenever footing(s) or foundation(s) are part of the construction operation. Concrete foundations shall have a minimum thickness of ten (10) inches of poured concrete. Reinforcing rods made of material to be approved by the Inspector shall be used when the Inspector deems conditions warrant their use. The top of all foundations shall be at least eight (8) inches above finished grade; this requirement may be waived at the discretion of the Code Enforcement Officer where masonry construction is employed. Block foundations shall be twelve (12) inches in width below grade and may be eight (8) inches in width above grade. Any portion of a foundation above grade shall be laid in and pointed with mortar.

Section 119.12 Other than Dwellings

Except when erected upon solid rock or otherwise protected from frost, the foundation walls, piers and other permanent supports of all buildings and structures shall extend below the frost line, and spread footings of adequate size shall be provided when necessary to properly distribute the load within the allowable bearing value of the soil, or such permanent supports shall be erected on piles or ranging timbers when solid earth or rock is not available.

Section 119.2 FOOTINGS

The footings shall be designed to resist frost action. When in the opinion of the Inspector soil conditions and the load to be imposed on the foundation walls make the requirements for footings unnecessary, the Inspector may permit footings to be omitted by written endorsement on the building permit.

Section 119.3 CERTIFICATION OF PLOT PLAN

After the foundation of a building for which a permit has been issued has been constructed, and before any further work shall be done on said building, a registered engineer's or surveyor's certification shall be furnished the Inspector, (unless he waives such requirement) showing the size of the building, and indicating that the location of the building is in compliance with the setback regulations set forth in the Protective Zoning Bylaw of the Town and including a statement signed by the engineer or surveyor that all distances are correct.

Section 120 MASONRY FIREPLACES AND CHIMNEYS

All masonry fireplaces and chimneys shall conform to Article 24 of The BOCA National Building Code, 1987 Edition.

Section 121 FACTORY-BUILT FIREPLACES AND EXHAUST SYSTEMS

Factory-built fireplaces or associated exhaust systems shall be approved by a recognized laboratory and such installation shall be inspected and approved by the Code Enforcement Officer.

Section 122 WOOD FRAMING

The dimensions specified in this Section shall be considered nominal dimensions. Splicing of structural wood framing members between bearing points will not be permitted. In all cases, regardless of location, where the structural strength of framing members is definitely impaired by cutting, drilling, or by inherent defect, such members shall be replaced or reinforced as required by the inspector. All framing materials shall be of sound merchantable stock of size sufficient to carry the loads imposed on them.

Section 122.1 GIRDERS

Section 122.11

Girders may be structural steel, solid wood, built-up wood or reinforced concrete.

Section 122.12

All joints of solid and built-up wood girders shall be made over pier or column supports.

Section 122.13 Girder Spans

The distance between supports under wood girders shall not exceed the following:

Maximum Clear Span

<u>Size in Inches</u>	<u>1 & 2 Story Dwellings</u>		<u>2-1/2 & 3 Story Dwellings</u>	
	<u>Ft.</u>	<u>In.</u>	<u>Ft.</u>	<u>In.</u>
4 by 6	5	0	4	0
6 by 6	6	0	5	2
4 by 8	6	4	5	6
4 by 10	8	0	7	0
6 by 8	8	0	7	0
6 by 10	9	0	8	0
6 by 12	10	0	9	0

Section 122.14 Columns

All first floor girders shall have lally columns under them. Columns below grade shall be concrete filled steel pipe, lally-type, and shall be fastened to girders with at least one-fourth ($1/4$) inch thick steel caps and attached to or imbedded in concrete with at least one-fourth ($1/4$) inch steel base. Steel pipe concrete filled columns shall be at least three and one-half ($3-1/2$) inches in diameter and weigh at least thirteen (13) pounds per linear foot.

Section 122.2 FOUNDATION ANCHORAGE

Wall sill plates, minimum of 2 inch by 4 inch members, shall be sized and anchored to foundation walls or piers and at intermediate intervals as required to resist wind uplift.

Section 122.21

All sills and girders on top of foundation walls and piers shall be leveled, shimmed up with slate chips or brick, and thoroughly bedded in cement mortar. All sills shall be at least four (4) inches by six (6) inches, laid flatwise, unless otherwise approved by the Inspector.

Section 122.22

Top plates shall be not less than doubled two (2) x fours (4's) which shall lap at all corners and at all intersecting partitions. All such laps shall be securely spiked.

Section 122.3 FLOOR JOISTS

When floor joists frame into the side of wood girders, the joists shall be supported on metal joists hangers or on a bearing strip or spiking strip on the side of the girders. Size of strip shall be at least two (2) by three (3) inches. The notch in the end of the joist shall be not more than one-fourth ($1/4$) of the joist depth.

Section 122.31

Headers and trimmers shall be doubled except that headers four (4) feet or less in length may be of single thickness provided the header is supported in metal joist hangers or on not less than two (2) by three (3) inch ledger boards and the header is secured by spikes driven through one thickness of the trimmers into the ends of the header.

Section 122.32

Ends of lapped joists shall rest on girders or on bearing partitions, and shall be securely nailed to the plate and to each other.

Section 122.33

Floor (including attic floor) and flat roof joists shall be cross-bridged with one (1) by three (3) inch bridging at intervals not to exceed eight (8) feet and securely nailed at each end. Metal bridging or solid bridging may be used.

Section 122.34

Maximum spans for all wood floor joists shall be as listed in the tables in Appendix A.

Section 122.35

The cutting of floor joists to facilitate the installation of piping and duct work will be permitted with the following limitations:

The top edges of joists may be notched not to exceed one-sixth ($1/6$) of the joint depth. Notching the top edge of joists will not be permitted in the middle third of any joist span. If cutting of a floor joist more than one-sixth ($1/6$) of its depth is found necessary, a header the full depth of the joist shall be cut in to support the end of the joist. Where location of pipes necessitates passing through the joists, holes shall be drilled to receive the pipes. The diameter of the holes shall be not more than one-half ($1/2$) inch greater than the outside diameter of the pipe and in no case greater than two and one-half ($2-1/2$) inches. The edge of the holes shall not be located nearer than two (2) inches from the top or bottom edge of the joist.

Section 122.36

All floor joists shall be covered with a minimum $3/4$ " tongue and groove sub-flooring. Ends of all subflooring shall be cut over joists. Five-eighths ($5/8$) plywood may be used in place of boards.

Section 122.4 EXTERIOR WALLS

Studding for outside walls and bearing partitions shall be not less than two (2) by four (4) inches spaced not over sixteen (16) inches on centers. All bearing partition studs shall rest on partition caps or shoes of the same size as the studs and capped with double joists of the same size. External studded walls shall be sheathed with wood boards three-fourths ($3/4$) inches thick, one-half ($1/2$) inch plywood or any other material of equal strength and durability as determined by the Code Enforcement Officer, laid tight with staggered joints and nailed to studs with eight (8) penny nails, or equivalent, in a manner satisfactory to the Inspector.

Section 122.41 Headers

Lintels over openings in bearing walls or partitions of one (1) and two (2) family dwellings shall consist of double joists, not less than herein specified, or trussed construction bearing on jack studs, or other approved construction affording adequate strength:

Spans less than four (4) feet Two - Two (2) x Fours (4's)
Spans four (4) feet ot six (6) feet Two - Two (2) x Sixes (6's)

Spans six (6) feet to eight (8) feet. . . . Two - Two (2) x Eights (8's)
Spans eight (8) feet to ten (10) feet . . . Two - Two (2) x Tens (10's)

Section 122.5 CEILING JOISTS

Maximum spans for ceiling joists shall be as listed in the table in Appendix B. Where the attic space above ceiling joists is unfinished but is usable for storage space, or if the space is suitable for finishing into future habitable rooms, the spans for the ceiling joists shall be figured the same as for floor joists as specified in the tables in Appendix A. Ceiling joists shall, wherever possible, serve as ties for the rafters and shall be securely nailed to the rafters.

Section 122.6 RAFTERS

Maximum clear spans of rafters for light and heavy roof covering shall be of sufficient size to carry a load of 40 lbs. p.s.f. including dead and live load as listed in the table in Appendix C5. Rafters shall be securely spiked to the wall plate. All openings in roof construction for dormer windows which are not supported on partitions shall be framed with double rafters and headers. Roof rafters shall be covered with a minimum 3/4 inch boards or other approved materials of equivalent strength and rigidity, and shall be securely nailed to rafters at each bearing.

Section 122.7 INTERIOR PARTITIONS

All bearing partition studs shall be not less than two (2) x fours (4's) spaced not more than sixteen (16) inches on center.

Nonbearing partition studs may be two (2) by threes (3's) set the three (3) inch way; two (2) by fours (4's) may be used, set the two (2) inch way for walls around closets and chimneys.

Wood bearing partitions in cellars or basements shall incorporate lally columns as specified in Section 122.14 of this Code. No stud shall be cut more than half its depth to receive piping and ductwork. If more depths is required, the partition studs shall be increased accordingly. Where the running of piping and duct work necessitates the cutting of plates, proper provision, acceptable to the Inspector, shall be made for tying together and supporting all structural members affected by such cutting.

Section 122.71 Stairs - One and Two-Family Dwellings

The minimum headroom in all parts of the stair enclosure shall be not less than 6 ft. 8 inches measured vertically from the tread nosing or from the finished floor surface of the landing or platform. The treads for interior stairs shall be not less than 9 inches; risers shall be not more than 8 inches. The cutting and framing of all structural members, such as stringers and landings shall be such that the development of their full strength will not be impaired. Stringers shall have solid bearings at top and bottom. If winders are used, the minimum depth of tread shall be 6 inches, and the minimum depth of tread shall be 9 inches at a point 12 inches from the narrowest edge.

Acceptable Winders

Section 122.8 HANDRAILS

Every builder or owner shall provide a safe hand rail and supporting bannister or other protective device for every stairway having a total rise of thirty (30) inches or more. Every builder or owner shall provide wall or protective railings at least thirty-six (36) inches high for every porch, balcony or similar place which is more than thirty (30) inches above ground.

Section 122.9 INSULATION

Insulating batts, blankets, fills or similar type of materials, including vapor barriers and breather papers or other coverings incorporated in construction elements shall meet the minimum standards for all habitable and commercial occupancies as set forth in the New Hampshire Energy Code.

122.91

It is required by the New Hampshire Energy Code that residential buildings meet the following standards:

- a. Minimum insulation levels.
- b. Combustion heating and hot water equipment to be rated 75% or greater efficiency, and that such equipment be labeled as meeting ASHRAE 90-75 or equivalent standards.
- c. Heat pumps meet appropriate coefficient of performance levels.
- d. Thermostats provide a range of at least 55-75 degrees Fahrenheit, and controls allow these systems to be shut down easily.
- e. Show flow rates be restricted to a maximum of three (3) gallons per minutes.

Section 123 GARAGES

Any garage built under a dwelling shall have its walls and ceiling covered with lathing and cement plaster or other fire resisting material as approved by the Inspector. If garage floor and cellar floor are on the same level, a sweep shall be installed on the door to prevent fumes from entering the cellar. Any garage attached to the side of a dwelling directly or with a breezeway shall have the wall adjacent to the dwelling or breezeway covered with wire lathing and cement plaster or other approved fire resistant material from ridge to floor.

Section 124 BASEMENTS

No heating equipment shall be installed within six (6) feet of a stairway, unless the stairway is protected in such a manner as to stop fire from traveling up the stairway.

Drain tile laid in stone around the perimeter of the foundation of a dwelling shall be laid when, in the opinion of the Inspector, additional drainage is necessary.

Section 125 MECHANICAL ROOMS

Enclosed mechanical rooms shall be ventilated as approved by the Inspector. Enclosed mechanical rooms of less than eighty (80) square feet shall be lined with a covering of wire lathing and cement plaster or five-eighths (5/8) fire coded sheet rock.

In public places of assembly, such as in churches, hotels, high hazard institutional occupancies, and apartments, and in multi-family house occupancies, the mechanical rooms shall be separated from the rest of the building by eight (8) inch masonry walls, and the ceilings shall be plastered with fireproof cement mortar and door openings shall be protected by approved self-closing doors.

Section 126 HEATING EQUIPMENT

Kerosene stoves and portable kerosene heaters (non-flue connected heater types) shall be barred from use in a dwelling, a business or in an industrial establishment, and all other oil or gas fired heaters must bear an approval label as a result of tests and listing by a nationally recognized testing laboratory, and a permit for the use of such heater(s) shall have been issued by the head of the Fire Department before a permit of occupancy is issued.

Approved non-flue connected heaters may be used temporarily during construction on approval of the head of the Fire Department.

Section 127 MEANS OF ESCAPE REQUIREMENTS

Section 127.1 Number of Means of Escape

Section 127.11 Primary Means of Escape

In any dwelling or living unit of two (2) rooms or more, every bedroom and living area shall have at least two (2) means of escape or alternate

protection, at least one (1) of which shall be a door or stairway providing a means of unobstructed travel to the outside of the dwelling at street or ground level. No bedroom or living area shall be accessible by only a ladder or folding stairs or through a trap door.

Section 127.12 Second Means of Escape

The second means of escape or alternate protection shall be one of the following:

- a. A door, stairway, passage or hall providing a way, independent of and remote from the primary means of escape, of unobstructed travel to the outside of the dwelling at street or ground level.
- b. A passage through adjacent non-lockable spaces independent of and remote from the primary means of escape to any approved means of escape.
- c. An outside window or door operable from the inside without the use of tools and providing a clear opening of not less than 20 inches (50.8 cm) in width, 24 inches (61 cm) in height and 5.7 sq. ft. (.53 sq m) in area. The bottom of the opening shall not be more than 44 in. (112 cm) off the floor. Such means of escape shall be acceptable if:
 - 1.) The window is within 20 ft. (6.1 m) of grade, or
 - 2.) The window is directly accessible to fire department rescue apparatus as approved by the authority having jurisdiction, or
 - 3.) The window or door opens onto an exterior balcony.

Minimum Size & Dimensions of Outside Windows Used as Second Means of Escape

- d. The bedroom or living area shall be separated from all other parts of the living unit by construction having a fire resistance rating of at least 20 minutes and shall be equipped with a door that will resist passage of fire for at least 20 minutes, and is designed and installed to minimize smoke leakage. A means of providing smoke venting and fresh air to the occupants shall be provided.

Exception No. 1: A second means of escape or alternate protection is not required:

- a.) If the bedroom or living area has a door leading directly to the outside of the building at or to grade level; or

Exception No. 2: Existing approved means of escape may be continued in use.

Section 128 MEANS OF EGRESS

Section 128.1 Application

These requirements apply both to new construction and to existing buildings. No change, either in the structure or the occupancy, that reduces the level of life safety is permitted. The objective is to provide an acceptable degree of safety in terms of not only the present, but also the future use of a building.

Section 128.2

Means of egress for both new and existing buildings shall comply with this Section of the Building Code.

Section 128.3

Any alteration or addition that would reduce means of egress below the requirements of this Code is prohibited.

Section 128.4

Any change of occupancy that would result in means of egress below the requirements of this Code is prohibited.

Section 128.5 Head Room

Means of egress shall be so designed and maintained as to provide adequate headroom, but in no case shall the ceiling height be less than 7 ft. 6 in. nor any projection from the ceiling be less than 6 ft. 8 in. nominal height from the floor.

Exception: In existing buildings, the ceiling height shall not be less than 7 ft. from the floor, with no projection below a 6 ft. 8 in. nominal height from the floor.

Section 128.51

Headroom on stairs is the vertical distance above a plane parallel to and tangent with the most forward projection of the stair tread.

The Method of Measuring Headroom on Stairs

Section 128.6 Changes in Elevation

Changes in elevation in areas constituting part of a means of egress shall be by stairs or by ramps.

Section 129 ROOF COVERING

The roof of every dwelling and garage attached thereto shall be covered with slate or asphalt roof covering weighing not less than two hundred and ten (210) lbs. per square or approved Class C fire resistant treated wood shingles laid according to standard building practice.

Not more than two (2) reshinglings of asphalt shingles shall be allowed without removal of old shingles, and no reshingling over wood shingles is allowed.

Section 130 FIRE PROTECTION SYSTEMS - SINGLE DWELLINGS AND MULTIPLE DWELLINGS OF SIX OR LESS UNITS

All new single family dwellings and new multiple dwellings of six (6) or less units shall be protected by smoke and heat detecting devices bearing the label of approval by a nationally recognized testing agency. Materials and equipment shall be installed in a neat and workmanlike manner in conformity with the requirements of the NFPA Standards.

Section 131 PLUMBING

Section 131.1

All buildings, structures and premises intended for human habitation, occupancy, use or employment, or the preparation or processing of food, drinks or other materials for human consumption, shall be provided with an adequate, safe and potable water supply through a safe system of piping to all fixtures, appliances and appurtenances. Such a water supply shall not be connected to an unsafe water source, nor shall it be subject to the hazards of backflow.

Section 131.12

Any installation of plumbing systems deemed unsafe and dangerous to the public health, in whole or in part, shall be made to comply with the provisions of this Code or as the Code Enforcement Officer shall deem fit.

Section 131.13

Plumbing fixtures, devices and appurtenances shall be supplied with water in sufficient volume and at pressures adequate to enable them to function properly and without undue noise under normal conditions of use.

Section 131.14

Hot water shall be supplied to all plumbing fixtures which normally need or require hot water for their proper use and function.

Section 131.15

Each family dwelling unit shall have at least one (1) water closet, one (1) lavatory, one (1) kitchen type sink, and one (1) bathtub or shower to meet the basic requirements of sanitation and personal hygiene. All other structures for human occupancy or use shall be equipped with sufficient sanitary facilities, but not less than one (1) water closet and one (1) lavatory.

Section 131.16

The drainage system shall be designed, constructed, and maintained to guard against fouling, deposit of solids, and clogging, and with adequate cleanouts so arranged that the pipes may be readily cleaned.

Section 131.17

Each fixture directly connected to the drainage system shall be equipped with a liquid seal trap.

Section 131.18

Each vent terminal shall be extended to the outer air and be so installed as to minimize the possibilities of clogging and the return of foul air to the building.

Section 131.19

The plumbing system shall be subjected to such tests as will effectively disclose all leaks and defects in the work or the material.

Section 131.2

No construction of either a building from which sewage will discharge or a disposal system may commence until the sewage disposal plans have been approved by the New Hampshire Water Supply and Pollution Control Commission. Once a system has been approved, it must be installed in strict accordance with the approved plans, inspected and approved for operation before being covered and used.

Section 131.3

Any proposed subdivision requiring New Hampshire Water Supply and Pollution Control Commission approval must have that approval prior to the sale, rent or lease of lots and prior to the construction of roads and other subdivision improvements.

Section 132 ELECTRICAL

Section 132.1

Installations of electric conductors and equipment within or on public and private buildings or other structures must meet the minimum standards as set forth in "The National Electrical Code 1987".

Section 133 OCCUPANCY PERMIT

No building of any type, except as otherwise provided herein, whether of a permanent or portable nature, hereafter erected, remodeled, restored, or moved, shall be occupied or used in whole or in part as a dwelling until the same shall have been inspected by the Inspector and a permit of occupancy issued by the Inspector, stating that the building and use thereof complies with the provisions of this Code, the laws of the State of New Hampshire and all other laws pertaining thereto. A permit of occupancy shall not be issued unless a building permit has been previously issued by the Inspector in accordance with the provisions of this Code. Application for a permit of occupancy shall be filed with the Inspector.

Section 133.1

Upon the request of the holder of a permit, the Code Enforcement Officer shall issue a temporary certificate of occupancy for a building or structure, or part thereof, before the entire work covered by the permit shall have been completed, provided such portion or portions will be occupied safely prior to full completion of the building or structure without endangering life or public welfare.

Section 133.2

Whoever occupies, or allows someone to occupy a dwelling that does not have an occupancy permit shall be guilty of a violation and shall be liable for a penalty of not more than fifty dollars (\$50) for each violation. Each day that a violation continues shall be deemed a separate offense. Payment of such penalty does not absolve any violator from the obligation under this Code to obtain an occupancy permit.

DEFINITIONS

Accessory Building. A building the use of which is incidental to that of the main building and which is located on the same lot.

Addition. An extension or increase in floor area or height of a building or structure.

Alteration. As applied to a building or structure, means a change or rearrangement in the structural parts or in the means of egress; or an enlargement, whether by extending on a side or by increasing in height; or the moving from one location or position to another.

Apartment Building. Any building containing three (3) or more living units with independent cooking and bathroom facilities, whether designated as apartment house, tenement, garden apartment, or by any other name.

Approved. Means "acceptable to the authority having jurisdiction".

Area, Building. The area included within surrounding exterior walls (or exterior walls and fire walls) exclusive of vent shafts and courts. Areas of the building not provided with surrounding walls shall be included in the building area if included within the horizontal projection of the roof or floor above (see Section 501.0).

Assembly Occupancy. Assembly occupancies include, but are not limited to, all buildings or portions of buildings used for gathering together 50 or more persons for such purposes as deliberation, worship, entertainment, eating, drinking, amusement, or awaiting transportation.

Authority Having Jurisdiction. The "authority having jurisdiction" is the organization, office, or individual responsible for "approving" equipment, an installation, or a procedure.

Basement. That portion of a building which is partly or completely below grade.

Building. Any structure used or intended for supporting or sheltering any use or occupancy. The term building shall be construed as if followed by the words "or portions thereof". (See Structure)

Building, Existing. Any structure erected prior to the adoption of this Code or for which a permit for construction has been issued.

Building Site. The area occupied by a building or structure, including the yards and courts required for light and ventilation, and such areas that are prescribed for access to the street.

Business Occupancy. Business occupancies are those used for the transaction of business, for the keeping of accounts and records and similar purposes.

Certificate of Use and Occupancy. The certificate issued by the Code Official which permits the use of a building in accordance with the approved plans and specifications and which certifies compliance with the provisions of law for

the use and occupancy of the building in its several parts together with any special stipulations or conditions of the building permit.

Change of Use. An alteration by change of use in a building heretofore existing to a new use group which imposes other special provisions of law governing building construction, equipment or means of egress.

Combustible. Capable of undergoing combustion.

Concrete. A mixture of cement, aggregates and water, of such proportions and manipulations as to meet specific requirements.

Concrete, Reinforced. Concrete in which reinforcement, other than that provided for shrinkage or temperature changes, is combined in such a manner that the two materials act together in resisting forces.

Corridor. An enclosed passageway which limits means of egress to a single path of travel.

Detector, Smoke. An approved, listed detector for sensing visible or invisible particles of combustion.

Door Assembly, Fire. A combination of a fire door, frame, hardware, and other accessories which together provide a specific degree of fire protection to the opening.

Door, Fire. A door and its assembly, so constructed and assembled in place as to give protection against the passage of fire.

Draft Stop. A continuous membrane to subdivide a concealed space to restrict the passage of smoke, heat and flames.

Dwelling Unit. A single unit providing complete, independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking and sanitation.

Educational Occupancies. Educational occupancies shall include all buildings used for educational purposes through the twelfth grade by six (6) or more persons for four (4) hours per day or more than twelve (12) hours per week.

Existing. That which is already in existence at the date when this Code goes into effect, as existing buildings, structures, or exit facilities.

Exit. That portion of a means of egress that is separated from all other spaces of the building or structure by construction or equipment to provide a protected way of travel to the exit discharge.

Exit Access. That portion of a means of egress which leads to an entrance to an exit.

Exit Discharge. That portion of a means of egress between the termination of an exit and a public way.

Exit, Horizontal. A way of passage from one building to an area of refuge in another building on approximately the same level, or a way of passage through or around a wall or partition to an area of refuge on approximately the same level in the same building, which afford safety from fire or smoke from the area of incidence and areas communicating therewith.

Fire Barrier. A fire barrier is a continuous membrane, whether vertical or horizontal, such as a wall or floor assembly, that is designed and constructed with a specified fire resistance rating to limit the spread of fire and which will also restrict the movement of smoke. Such barriers may have protected openings.

Fire Resistance. That property of materials or their assemblies which prevents or retards the passage of excessive heat, hot gases or flames under conditions of use.

Fire Resistance Rating. The time, in minutes or hours, that materials or assemblies have withstood a fire exposure as established in accordance with the test procedures of NFPA 251, Standard Method of Fire Tests of Building Construction and Materials.

Firestopping. Building materials installed to prevent the movement of flame and gases to other areas of a building through small concealed passages in building components such as floors, walls and stairs.

Flame Spread. The propagation of flame over a surface.

Flame Spread Rating. The measurement of flame spread on the surface of materials or their assemblies as determined by the tests specified in this Code.

Floor Area, Gross. Gross floor area shall be the floor area within the inside perimeter of the outside walls of the building under consideration with no deduction for hallways, stairs, closets, thickness of interior walls, columns or other features.

Floor Area, Net. Net floor area shall be the actual occupied area, not including accessory unoccupied areas or thickness of walls.

The net area is arrived at after deductions have been made for the space that structural features and fixtures occupy. This would include hallways, stairs, closets, interior walls, columns, counters, display racks, tables, bars, dividers, planters, displays, and other items which take up space that might otherwise have been used for human occupancy.

Grade. A reference plane representing the average of finished ground level adjoining the building at all exterior walls. When the finished ground level slopes away from the exterior walls, the reference plane shall be established by the lowest points within the area between the building and the lot line or, when the lot line is more than 6 feet (1829 mm) from the building, between the building and a point of 6 feet (1829 mm) from the building.

Guard. A vertical protective barrier erected along exposed edges of stairways, balconies, etc.

Habitable Space. Space in a structure for living, sleeping, eating or cooking. Bathrooms, toilet compartments, closets, halls, storage or utility spaces and similar areas are not considered habitable space.

Handrail. A bar, pipe, or similar member designed to furnish persons with a handhold. (A handrail, if of suitable design, may also serve as part of a guard.)

Hazardous Areas. Areas of structures, buildings, or parts thereof, having a degree of hazard greater than that normal to the general occupancy of the building or structure, such as storage or use of combustibles or flammables, toxic, noxious, or corrosive materials or use of heat-producing appliances.

Heated Space. A space within a building which is provided with a positive heat supply. Finished living space within a basement, or registers or heating devices designed to supply heat to a basement space shall define that space as heated space.

Height

Building. The vertical distance from grade to the top of the highest roof beams of a flat roof, or the mean level of the highest gable or slope of a hip roof.

Story. The vertical distance from top to top of two successive tiers of beams or finished floor surfaces; and, for the topmost story, from the top of the floor finish to the top of the ceiling joists, or, when there is not a ceiling, to the top of the roof rafters.

Walls. The vertical distance from the foundation wall or other immediate support of such wall to the top of the wall.

Horizontal Exit. A horizontal exit is a way of passage from one building to an area of refuge in another building on approximately the same level or a way of passage through or around a fire barrier to an area of refuge on approximately the same level in the same building that affords safety from fire and smoke from the area of incidence and areas communicating therewith.

Label. A plate, tag or other device permanently and prominently affixed to a product or material indicating that it has been tested and evaluated by an approved agency.

Lintel. A beam placed over an opening or recess in a wall which supports the wall construction above.

Load. Forces or other actions that arise on structural systems from the weight of all permanent construction, occupants and their possessions, environmental effects, differential settlement and restrained dimensional changes.

Load, Dead. The weight of all permanent structural and nonstructural components of a building, such as walls, floors, roofs, ceilings, stairways and fixed service equipment.

Load, Live. The weight superimposed by the use and occupancy of the building, not including the wind load, earthquake load, or dead load.

Masonry. A built-up construction or combinations of building units or materials of clay, shale, concrete, glass, gypsum, stone or other approved units bonded together with mortar or monolithic concrete. Reinforced concrete is not classed as masonry.

Means of Egress. A means of egress is a continuous and unobstructed way of exit travel from any point in a building or structure to a public way and consists of three (3) separate and distinct parts: (a) the exit access, (b) the exit, and (c) the exit discharge. A means of egress comprises the vertical and horizontal travel and shall include intervening room spaces, doorways, hallways, corridors, passageways, balconies, ramps, stairs, enclosures, lobbies, escalators, horizontal exits, courts, and yards.

Means of Escape. A way out of a building or structure that does not conform to the strict definition of means of egress but does provide an alternate way out.

Mercantile Occupancies. Mercantile occupancies include stores, markets and other rooms, buildings or structures for the display and sale of merchandise.

Mezzanine. An intermediate level between the floor and ceiling of any story or room and covering not more than one-third of the floor area of the room or story in which it is located.

Mobile Home. A structure of vehicular, portable design, built on a chassis and designed to be moved from one site to another, and to be used with or without a permanent foundation.

Noncombustible. A material which, in the form in which it is used, and, under the conditions anticipated, will not aid combustion or add appreciable heat to an ambient fire.

Occupancy. The purpose for which a building or portion thereof is used or intended to be used.

Occupant Load. The total number of persons that may occupy a building or portion thereof at any one time.

One- and Two-Family Dwellings. One- and two-family dwellings include buildings containing not more than two (2) dwelling units in which each living unit is occupied by members of a single family.

Outside Stairs. Outside stairs include stairs in which at least one side is open to the outer air.

Permit. An official document or certificate issued by the authority having jurisdiction which authorizes performance of a specified activity.

Professional Engineer or Architect. An individual technically and legally qualified to practice the profession of engineering or architecture.

Public Way. Any street, alley or other parcel of land open to the outside air leading to a public street.

Recognized Source. A nationally recognized laboratory or testing agency.

Ramp. An inclined floor surface.

Repair. The reconstruction or renewal of any part of an existing building for the purpose of its maintenance.

Required. Shall be construed to be mandatory by provisions of this Code.

Residential Occupancies. Residential occupancies are those occupancies in which sleeping accommodations are provided for normal residential purposes and include all buildings designed to provide sleeping accommodations.

Roof. The roof slab or deck with its supporting members, not including vertical supports.

Self-Closing. Equipped with an approved device which will ensure closing after having been opened.

Shall. The term, when used in this Code, shall be construed as mandatory.

Smoke Detector. A device which senses visible or invisible particles of combustion.

Storage Occupancy. Storage occupancies include all buildings or structures utilized primarily for the storage or sheltering of goods, merchandise, product, vehicles or animals.

Story. That portion of a building included between the upper surface of a floor and the upper surface of the floor or roof next above.

Street. Any public thoroughfare that has been dedicated or deeded to the public for public use and is accessible for use by the fire department in fighting fire.

Structure. That which is built or constructed.

Vertical Opening. An opening through a floor or roof.

POLICE DEPARTMENT REPORT

In March of 1987 at Town Meeting, this department asked for more full time help. Currently we have two (2) full time Officers, the Chief and the Sergeant, and seven (7) part time Officers. We stated some of the reasons for the need being growth, increase of traffic through and within the Town, and the increase of calls for service. This request was turned down. I was very discouraged and very disillusioned when the Town voted to spend one hundred and seventy thousand dollars (\$170,000.00) for a recreation facility that is used approximately three (3) months a year, yet turned down monies to give them adequate police protection for twelve (12) months.

It appears that some voters voted no to requests at Town Meeting made by the Police Department because of ill feelings due to either an arrest or a summons, and not whether the request would benefit the Town. I feel this is an injustice, not only to the Department, but to the persons who have a need for a Police Officer and have to wait for their assistance due to the one Officer on duty that may be involved in another matter of higher priority. We have been criticized by some people for a shift or shifts not being covered and having to use the State Police or a neighboring Police Department, yet some of these people either vote no on our requests, or don't even bother going to Town Meeting at all. Or in the case of the midnight shift, the Officer being on call has to get up, put on his uniform, and respond to the call, taking some time.

This past year, the Department investigated a homicide. After the arrest was made, approximately 336 man hours of investigation were required, taking the Officer out of Town on occasions. Because of the severity of the crime, this investigation demanded top priority and some calls had to be delayed.

No sooner was the homicide investigation completed and tried, we became involved in an armed robbery of a variety store in Town and a drug investigation in which approximately 150 man hours were required after the arrest was made. It took Officers again out of state for the investigation. The hours put into this case does not include the time in Court, or the countless hours the secretary spends in typing up the reports and the case preparation. As well as the above incidences, the Department investigated two fatal accidents and three rapes.

In June of 1987, we received our new cruiser and as most townspeople have noticed, we have changed the color of our units for higher visibility purposes. I would like to thank Larry and Marybeth Somero for the design of the new seals on the cruisers.

In July of 1987, Sgt. Somero left our Department to take a position with the Department of Safety. In August, John Wagner was hired to replace Sgt. Somero. Officer Wagner came to us fully qualified and certified by the State of New Hampshire.

In August of 1987, we were very fortunate in the hiring of Denise Holman, who formerly worked in a Law office in Peterborough, part time in the New Ipswich Town Office, and also part time in our Department. She has taken over the clerical end of our police duties, which has allowed us more

time to be out on the street and take better care of that aspect of our police duties.

This year the Department investigated 246 Criminal Cases, 95 Accidents, and received 6,653 calls, of which approximately 400 complaints were answered by the midnight Officer on call. There were 515 cases brought before the Peterborough District Court.

The following calls were received by the Department in 1987. This excludes calls of assistance in personal matters or advice needed and received at my home, and at the homes of the Officers. In 1987, we received 6,653 calls and complaints. They are as follows:

Criminal Cases	246	Accidents	95
Missing Persons	4	Stabbings	1
Thefts	28	Burglaries	22
Homicides	1	Brawls	8
Rapes	3	Arson	2
Domestics	18	Narcotics	7
Stolen MV's	2	Recovered MV's	4
Armed Robbery	1	Shooting	
Untimely Deaths	1	Complaints	5
		Miscellaneous	
		Complaints	6,215

I would like to thank the Board of Selectmen, Fire Department, Highway Department, and the Town Office personnel for their support and assistance in the past year. I would also like to thank all the members of the Police Department for a job well done. With the support of the townspeople, we will be able to do better. Thank you.

Respectfully submitted,

Chief Raymond D. Brodley

POLICE DEPARTMENT BUDGET 1988

Chief's Salary	\$ 30,000.00
Chief's Insurance	750.00

Telephone	1,500.00
Radio Repairs	500.00
Supplies/Equipment	4,000.00
Electricity	600.00

Total 1988 Budget \$143,000.00

HIGHWAY DEPARTMENT REPORT

The Highway Department had a busy year in 1987. Several storms in January put a real strain on our winter budget, as we had to buy more sand than anticipated, and there were a lot of overtime hours spent by the members of the department which also caused us to spend more money than planned.

The heavy rains in early spring caused damage to many of our roads. We have been partially reimbursed through Federal disaster funds, but a great deal of money had to come from our operating budget. With the work done on Fox Farm Road this fall, we now have completed all of the damage from the spring.

This year we did work on Collins, Matson, and Hubbard Pond Roads. We also worked on the drainage on Timbertop Road.

We continued with our program for road sealing, doing a total of five miles. We also sealed the edges on Temple Road, and by doing so, we have postponed sealing that whole road 2-3 years. We also continued with the roadside mowing, although we fell somewhat behind in this area in 1987.

As we spent much of this summer and fall short of help, we were not able to do all the work that was originally planned.

For 1988, we plan to continue with our road sealing and brush cutting programs.

In 1987, we sprayed some of our dirt roads with Liquid Calcium Chloride, and this proved to be a very successful experiment. We plan to continue this in 1988.

In late 1987, we started working on our "Capital Improvement Program". It is believed that this will be a great help as the Town starts planning for the future.

As the Town continues to grow, the demands on this Department have been increasing even faster. We ask that you be patient and understanding when asking for maintenance and needs.

The Highway Department would like to thank the Selectmen and all other Town Departments for their help in 1987, and we look forward to working together in 1988. We also want to thank you, the taxpayers, for all your understanding and cooperation, as it makes our job a lot easier. I especially want to thank the "girls" in the Town Office for all the help given me, as without it, the job would be almost unbearable.

I want to thank the Highway crew for all their support given me, and for their excellent work and dedication given to the Town of New Ipswich.

Respectfully submitted,

David Leel, Road Agent

Highway Department

HIGHWAY BUDGET 1988

WINTER AND SUMMER MAINTENANCE:

Labor	\$120,000
Dust control	5,000
Culverts	6,000

Gasoline	5,000
Heat	3,000
Uniforms	3,000
Miscellaneous	2,500
	<u>\$ 27,300.00</u>

TOTAL 1988 BUDGET

\$244,300.00

SANITARY LANDFILL REPORT

In the beginning of 1987, our plans were to continue the landfill in the same manner as it had previously been run. In April, we were notified by the owner, Mr. Preston, that the 138 acres of land was for sale. Since the original agreement stated that New Ipswich had the first option to purchase, we held a special meeting in July to raise the \$212,500.00 needed for the purchase. This was an opportunity which most towns never get, and the voters in attendance were very decisive in their actions. With an affirmative vote, we have been able to exercise more control over our landfill area. We stopped selling gravel to the general public, to analyze our own needs. If it is deemed wise and feasible, we may sell a limited amount in the future years. Since there had been a previous problem with demolition materials, etc., coming from areas outside New Ipswich, we initiated a fee system to control the stump dump area and immediately reduced the input. The New Ipswich Landfill is no longer the easy target it once was for surrounding areas, resulting in a space savings for you, the taxpayer.

Since our area was becoming small, we decided it was an opportune time to cut a buffer zone of 8 acres for future landfill use. We also hope to use the sand from part of this area for our winter sand stockpile. The end result will be a substantial savings to you, the taxpayer, as the amount spent for cutting is equal to buying 3,000 yards of

screened sand. The area should be adequate for a number of years, depending on input and how well the planned re-recycling program works.

This year you will be asked to appropriate \$15,000.00 to set up the planned recycling program. How well it works will depend on you, the taxpayer, becoming involved in this voluntary plan. It could, and should, result in a large space savings for the landfill area, if the money is allocated. Most recycling is done in conjunction with State agencies such as New Hampshire the Beautiful, and our plans are to continue along these lines.

Other items to be addressed in the future are possible buildings for Town equipment storage, and landscaping at the entrance. We need citizens' ideas and input to help make this facility something we can all be proud of for many years to come.

Respectfully submitted,

George H. Lawrence, Chairman
Board of Selectmen

FIRE DEPARTMENT REPORT 1987

We are pleased to say that the number of calls for 1987 dropped to 84. This reflects your efforts to keep your home and property in a fire safe condition. Your efforts in fire safety are the best protection anyone can provide. No department, no matter how well trained or equipped, can take this all important first step for you. This first step in fire safety is up to you and we thank and congratulate you for your efforts.

We support and encourage the following fire safety ideas and hope that you will follow them:

1. If you do not have smoke detectors, install them. State law requires them in all new construction.
2. Have a fire escape plan for your home. Conduct a fire drill involving all members of the household. Have a safe outside meeting place. Discuss what should be done in case of fire.
3. Keep your home free of fire hazards. Do not store flammables or allow materials to accumulate that can be a fire hazard.
4. Keep all exits clear: both inside and out.
5. Keep all wood stoves and chimneys in a safe, working condition. Uncontrolled chimney fires can easily spread to walls or an attic in a damaged chimney.

During the year, a great deal of time and effort was spent training within the department and at Fire Schools. We also drill with surrounding towns with whom we have mutual aid agreements. These mutual aid agreements are of great benefit to all involved, as they provide the added equipment and manpower that one town cannot provide on its own. We extend our thanks to all the towns that came to our aid this year, and are happy to have been able to return the aid to them when needed.

Thank you for your support this year. We look forward to serving you in 1988. If you have a question or a problem, do not hesitate to call on us. We are here to serve you.

Sulo Kolapakka, Jr. - Chief

Members, New Ipswich Fire Department

NEW IPSWICH OFFICE OF EMERGENCY MANAGEMENT

Civil Defense has now become the Office of Emergency Management at Federal, State and local levels. The function of the local office is to coordinate the available resources within the town and to help with requests for additional supplies and manpower from the State.

Each year, the plans of the town are reviewed and updated. If you can provide a special service or type of equipment and would like to be included within our plans, please call and let us know.

Respectfully submitted,

Philip Nickson, Director

REPORT OF TOWN FOREST FIRE WARDEN
AND
STATE FOREST RANGER

Between July 1986 and June 1987, we experienced fewer fires than normal. The three leading causes of forest fires were again children, fires kindled without written permission of a Forest Fire Warden and debris burning. All causes are preventable, but only with your help.

Please help our town and state forest fire officials with forest fire prevention. Contact your Forest Fire Warden for more information.

Enforcement of a state timber harvest regulation is the responsibility of State Forestry officials. Our state has excellent timber harvest regulations; however, your assistance is needed.

If you know of a logging operation and suspect a state timber harvest tax law may be violated, call your Forest Fire Warden, or Concord Forest Protection Headquarters at (603) 271-2217.

If you own forest land, you became responsible for the timber tax payment starting April 1, 1986. This is a change in the Timber Tax Law that will impact all forest landowners. Contact your Board of Selectmen for timber tax forms.

PLANNING BOARD ANNUAL REPORT 1987

As this decade draws to a close, the Town of New Ipswich finds itself in the region of the State that is experiencing very significant growth pressures. The volume of business the Planning Board has dealt with this past year, is summarized in the chart on the following page.

Along with the time spent handling a full work load of subdivision hearings the Planning Board revised the Subdivision Regulations to include a section on back lots. The Board also worked extra meetings to write a first time Site Plan Review ordinance under the authority granted the Board by Article 16 on the warrant of the 1987 Town Meeting. As allowed under the new Zoning Ordinance passed at the 1987 Town Meeting, the Planning Board was able to write a new section of the Subdivision Regulations to deal with Cluster type subdivisions.

The Board also held hearings for a new Building Code Ordinance written under the direction of the Town Zoning Officer and the Selectmen. The Planning Board's responsibility to guide the ordinance through the proper procedure to place it on the warrant for Town Meeting 1988.

The Board began work on the preparation of a Capital Improvement Plan and appointed a committee to work with Town department heads to help identify and project the future needs of the Town as it grows.

It is important to note that much of the best land for development in New Ipswich has already been subdivided and built upon. Hence, many of the subdivisions that came before the Board this year had problems inherent in them. Some of these problems involved characteristics of the land itself such as wetlands and steep slopes, and others involved roads, whether it was dealing with Class VI roads or building new roads into back land.

In addition to all their other duties, Board members took part in ongoing education seminars and conferences provided by the New Hampshire Municipal Association. To assist the Board in its work, the Hillsborough County Conservation District provided the Board with the services of the Soil Conservation Service whose staff was an invaluable resource for us.

To a greater extent than ever before, the Board has used the services of the Southwest Region Planning Commission. The staff planners reviewed many of our larger subdivisions as well as assisted the Board in writing and revising our regulations. A new Applicant Assistance Program was initiated to provide a Planning Commission planner in New Ipswich on Tuesday afternoons to assist the board to review the progress of applicants in the preparation of their applications for the public hearing.

Lastly, we cannot end this report without paying tribute to our secretary, Margaret Rodenhiser, who retired this year after giving so generously of herself over the years. The portion of her work that has been visible to the public is only the tip of the iceberg that represents the enormous contribution that she has made to our town. Thank you, Peg, from the bottom of our hearts.

We are grateful to Eleanore Webber and Cindy Morris who have agreed to carry on the important job of providing secretarial and administrative services to the Planning Board.

Respectfully submitted,
Mary Jane Grasty, Chairman
New Ipswich Planning Board

	\$ 24,300.00

ANNUAL REPORT OF THE CONSERVATION COMMISSION 1987

The Conservation Commission members put in many hours this year doing a variety of tasks; in fact, many more hours than were spent in monthly meetings.

For example, time was spent attending workshops, seminars and State sponsored meetings which were all devoted to conservation themes such as wetlands management, forestry management, soil erosion, septage and waste disposal concerns, State regulations regarding conservation, etc. All of these conferences bring new information and expertise to be applied to solving our local problems and protecting our environment in New Ipswich.

Another example of time spent was in making site visits to all "Dredge and Fill" applications which came over the year - 11 in number. Each one required not only a site visit, but a written report which then went to the Planning Board and sometimes the Board of Adjustment before final approval.

Ongoing during the year were two major projects which fell within our jurisdiction:

1. Leasing three dam sites from the State Water Resources Board for 50 years at \$1.00 per site. The three sites in question are #13 on Temple Road, #14 on Thayer Road, and #35 in Smithville.
2. The Hoar Pond Development Project made possible by a fifty-five acre land gift to the Town by Bronson Potter of Mason in January, 1987.

With regard to the dam sites, the 1987 Town Meeting approved the plan to lease the three mentioned State owned areas and added two amendments: 1) to allow hunting and trapping and 2) to present a report on the management plans for each site before the next Town Meeting. The purpose of the leasing was to protect and preserve the natural environments, encourage plant and animal life, and provide space for recreation for the public. Our local community would supervise appropriate use of the areas.

As directed, three bases were prepared, management plans developed, and another public meeting was held November 1987 to present plans and to receive input from citizens.

Abutters and others became actively involved in the process. They made known considerable understandable concern about the expressed wish of some citizens that hunting be allowed on the sites in addition to all other recreational uses, i.e. walking, picnicking, boating and fishing.

After much discussion and research, the Conservation Commission members decided to include in the plans a provision for "controlled hunting except in posted safety zones" on sites #14 and #35. A warrant article was prepared for the March 1988 Town Meeting to accept a report to the Town prepared by the Conservation Commission.

The land gift to the Town by Bronson Potter not only provides the Town with a beautiful natural area for recreation, but it also offers access to the pristine undeveloped Hoar Pond area. This gift is a source of future matching grants from both Federal and State resources which the Conservation Commission proposes to use to preserve the Potter property and the natural area around Hoar Pond. The

Conservation Commission wishes to take this opportunity to thank Mr. Potter for his generous gift to the Town of New Ipswich.

In order to prepare the proposal for Federal matching funds, the Potter property had to be appraised and surveyed. Much time was spent in consultation with abutters, legal counsel, state advisors, and preparation of the proposal to the State Division of Recreation. The probability of winning the proposal is high.

Changes took place in the membership of the Conservation Commission. We lost Carol Russell to another community. Wes Chauncey went to school in Arizona. We gained Nat Ober, Gigi Carwellos and Nicholas Kenney, bringing membership to eleven, comprised of eight regular and three alternate members.

The Conservation Commission welcomes citizen interest and participation. Join us, as we have several active projects for 1988.

New Ipswich Conservation Commission

CEMETERY TRUSTEES REPORT 1987

Once again, we were able to continue the maintenance and restoration of both cemeteries.

Plans this year, if there are no major problems, will be to continue the headstone repairs, brush cutting, and general maintenance. Hopefully, we will be able to have all the headstones repaired this year. It is costly, to say the least.

Once again, we would like to thank the Highway Department, Board of Selectmen, and Marilyn Somero and Cindy Morris for all of their assistance in 1987.

Through a united effort, we should be able to make our cemeteries a place everyone can be proud of.

There were a total of 22 burials performed in 1987.

Respectfully submitted,

George Lawrence
Gladys Davidson
Leo Aijala
Cemetery Trustees

RECREATION DEPARTMENT REPORT

During the last few years, our Recreation Department has been overwhelmed by the increasing number of youths involved in sports. Our winter basketball program, which includes boys and girls grades 4 through 6, has been a tremendous success, with over 90 young people participating last season.

Although our department does not subsidize any other sport with regard to uniforms and equipment, we do provide and maintain the field area for others to use. Our local Little League organization, consisting of T-ball, minor and major teams, involved 125 children during 1987. Our facilities are also used by Babe Ruth baseball, adult softball teams, and Pop Warner football. Through the generosity of local patrons and numerous adult volunteers, a variety of sports are enjoyed at minimal cost to our Town.

During the warm months, basketball and tennis courts are available to all Town residents, and after sunset, games can continue under the lights until 10 p.m. It should be noted that to maintain optimal conditions in our recreation areas, we must all work together and abide by the rules.

Our Police Department has done an excellent job in seeing that regulations pertaining to curfew, litter and unauthorized vehicles on the field are enforced, and your cooperation would be greatly appreciated.

In closing, the Recreation Committee would like to thank our past members for their time and effort which they have donated over the years.

Respectfully submitted,

Ronald Santerre

Recreation Committee

POOL COMMITTEE REPORT

We would like to express sincere thanks for the overwhelming support we received at the 1987 Town Meeting and throughout the season. It surely made the summer program a success. Even the biggest problems seemed smaller with the support and help from so many in the community.

A lot of repairs had to be done before the summer program could begin: broken skimmers, broken pipes, septic system, disarray in the Rec. Room, bath and filter houses. All this had to be taken care of by someone. Many, many hours were spent dealing with this. Even the Brownies and Girl Scouts spent a day cleaning the yard and planting flowers to help beautify the grounds. The inspection by the State was passed and they complimented us on the great improvement. Thanks again to so many who helped us.

Karyn Kivela, D. Sue Sargent, and Sandy Somero did a great job with lessons, free swim and summer activities. The children's big events were a great success. "Make Your Own Sundaes for \$1.00", "Stuffed Animal Contest", Bike Ride to Silver Ranch", "Hat Day", "Climb Mount Monadnock", and the annual "Hampton Beach Trip" and "Family Campout" were enjoyed by all - old and young. The playground was a constant place of activity all summer, thanks to the careful planning and preparation by this committee.

Our goal for this summer program is to have a playground and pool area that we are PROUD of and can be enjoyed by all townspeople and their children, safely. We hope you can take an interest in what we are doing and will continue to support our efforts. This success can only continue with your financial and physical help.

We hope to see many new and familiar faces this coming summer, and look forward to a great year.

Voluntarily yours,

Ruth Somero
Suzanne Hill

BOARD OF ASSESSORS REPORT

Three years ago the Board of Assessors began the practice of sending a notification letter to taxpayers who had incurred a significant increase in their assessment, usually \$2,500.00 or more. The purpose of this practice was to cushion the shock and to allow taxpayers to budget for the impending increase. As a side benefit, it induced affected taxpayers to meet with the Board to air potential grievances, to clear up misunderstandings, and to better understand the assessing process substantially before the tax bills come out. As a consequence, applications for abatements have decreased to a very few.

This year the warrant includes an article requesting the voters to ante up \$60,000.00 to have the Town professionally re-evaluated. The last such re-evaluation was done in 1976. Since then, property values have, of course, increased and currently, on the average, assessments are about one-fourth of market values. This in itself is not highly significant; what is significant is that the Board is constrained to use the tables established in 1976. These tables are badly out of date so that inequities have undoubtedly crept in. The evidence for these inequities is a very large statistical dispersion in the ratio of assessments to actual sales figures about the one-fourth average. This ratio and the dispersion are determined by the State. In effect, some taxpayers are paying less and some are paying more than their fair share. Except for the decrease of inequities, taxes will not change drastically. The updating of assessments will be counterbalanced by a large reduction in the tax rate, probably in the area of \$20.00. The Board strongly urges the voters to approve the warrant article.

There are now almost 1,500 taxable real estate parcels in Town. With this large number of parcels to be reviewed annually and the high building activity, some errors and misjudgements are bound to occur. The Board members wish to extend their sincere thanks to the taxpayers of the Town for their continued cooperation and patience.

Respectfully submitted,

Oiva Anderson, Chairman
Bruce Hamilton
Lydia Noukas

126 Building Permits Issued
(59 Single Family Residences)

* Building Trades Program

As the number of building permits issued this year indicates, New Ipswich continues to be one of the fastest growing towns in the Monadnock Region. A total of 126 building permits were issued this year, 59 of which were single family residences.

Due to the increase in proposed public facilities and the number of speculative residences, the Planning Board is proposing a Building Code for the Town of New Ipswich. The intent of this proposed Code is to achieve at least a minimal level of life safety in all new structures and in all new occupancies. The primary motivating forces behind this proposed document are the need to counter the effect of fire upon the occupants of a structure; the need for occupants to find safety; the need to provide the structural elements that will ensure safety; state regulations in terms of performance of materials or systems; and make possible the acceptance of new materials and methods of construction. Nothing in this proposed Code is intended to prevent the use of systems, methods or devices of equivalent.

Respectfully submitted,

Bruce R. Hamilton
Building Permit Officer

VETERANS WAR MEMORIAL COMMITTEE

A second memorial is under construction at South Cemetery, Smithville. A section has been chosen and partially cleared for the stone and flagpoles. The flagpole that was standing in front of Attar Inc. was allowed to be moved with the permission of Mr. & Mrs. Martin. This flagpole was donated by Mr. & Mrs. Chandler in memory of their son Arthur who died in a plane crash while in the service of his country.

The flagpole was transported to Mon-Fab by Bill Seppala's crew where it was sand blasted, then taken to Tuttle's Salvage where it was painted. The base was taken to South Cemetery by George Maki and placed in the ground. The pole with new rope and a flag that was donated by Nat and Natalie was then transported by Mr. M. "Chico" Vegas and raised.

Some wood chips were bought to finish the landscaping at Center Cemetery by monies that were raised by donations. A special thanks to the N.I.A.A. for a generous contribution and to the townspeople who donated by filling the jugs placed in the stores.

Gross Take	\$250.31
Chips	90.00
Balance	<u>\$160.31</u>

MEMORIAL DAY REPORT

Memorial Day was held May 24th, 1987 with music provided by the Temple Band and the Mascenic High School Band. Both bands played at the morning service at Smith Village Cemetery and the afternoon program at Center Cemetery. The Temple Band provided a concert at the Barrett Mansion for the mid-day break which was hosted by Peg and Jim VanValkenburgh.

The morning coffee in Smith Village was hosted by Sylvia Lawrence as well as the afternoon refreshments at Memorial Field at the concert sponsored by the Stearns Burton Committee.

A note of thanks to George and Joyce Hopkins for all their help in Memorial Days past and to all Town Departments and local businessmen and individuals who helped make this successful. The local schools held observance at the various monuments and cemeteries.

Respectfully submitted,

Frank Matthews

THE SOUHEGAN VALLEY AMBULANCE SERVICE, INC.
P.O. BOX 134
Greenville, New Hampshire 03048
TEL: 603-878-1611

ANNUAL REPORT 1988

The Souhegan Valley Ambulance Service, Inc. continues to provide efficient professional quality service to the communities of Greenville, Mason, New Ipswich, and Temple. This service is possible only through the dedication of our well-trained Driver/Attendants, all of whom are volunteers. Most of these volunteers are now Nationally Registered Emergency Medical Technicians-Ambulance. Many have also undergone advanced training to become EMT-Intermediates, for example, EOA (Esophageal Obdurator Airway.) We are presently looking into more advanced training so some of our Attendants may administer IV's. Our attendants are usually on all night call about seven(7) times a month. There presently exists a need for volunteers who are able to answer call during the daytime. Any resident of the four(4) town area interested in joining the Service are encouraged to contact any attendant or member of the Board of Directors.

The service is presently looking into replacing the older ambulance's chassis, cab and engine coupled with having the ambulance module refurbished in the near future. This ambulance unit is over ten(10) years old.

The Souhegan Valley Ambulance Service continues to operate at no expense to the individual requiring emergency ambulance service. The projected annual per capita cost for 1988 for the four(4) towns is \$4.11, which is a small increase from last year. This is proportionate to the increased number of calls that is anticipated due to population growth in the area.

For some years now, Souhegan Valley Ambulance Service has had difficulty maintaining an adequate number of volunteers who are available to cover ambulance calls during the daytime hours on weekdays. The Board of Directors has tried various approaches to solicit and train ambulance attendants to relieve this situation. This year we foresee even more difficulty in doing this. We have also relied on the availability of mutual aid from services in surrounding communities, but they are also having difficulty providing daytime coverage. Because of this we cannot state that we will be able to provide prompt care for all emergency calls.

Because of the shortage of daytime volunteer manpower we have already experienced some delays in response times, particularly when we have need to have another service respond into the area, or when one of our volunteers has needed to respond from an unusual distance.

In order to provide the high quality care that people have come to expect from this service we feel that the time may have to come to have two full time paid attendants on duty during the daytime. We will continue to provide weekend and nighttime coverage with volunteers as we have in the past.

We feel that this matter should be put before the voters of the district so that they will be aware of this situation and will have an opportunity to decide how they want to resolve it. We can provide the service, but at a cost, or the voters can choose to accept that emergency medical care may at times be delayed.

The Souhegan Valley Ambulance Service, Inc.

COMPUTER STUDY COMMITTEE REPORT

With the approval at Town Meeting in March, a Computer Study Committee was formed consisting of several very competent and experienced persons in the field of computers. Next step was preparing what we felt the Town would require for a computer (hardware) and also what we would require for software, or programs, that we would use.

We held several meetings, with everyone putting in their ideas and recommendations for the hardware and programs that would be required. Bids were sent to 25 companies for both items. We received back 15 replies, which we felt was an excellent response. Process of elimination began with reviewing products and prices. After review, we narrowed the choice to two main companies for the software:

1) Business Management, Franconia, NH, and 2) Municipal Data Systems, Skowhegan, ME. Both companies specialize in Town programs.

We visited and talked to several towns regarding both companies. In July it was the committee's recommendation to purchase the software from Municipal Data Systems.

After reviewing bids on the hardware, it was decided that we could purchase a better computer, with accessories, at a lower price from Computer Hut in Nashua. We purchased an IBM Compaq 286 Deskpro with a color monitor, and an Epson EX-1000 printer. We will be able to add to this equipment as needed.

December tax bills were generated from this new system. We are asking that if you have any questions or had any errors (spelling, property locations), please give the Town Office a call; we will gladly explain or correct any errors that may have occurred.

I would like to personally thank all those who served on the committee. The Town was very fortunate to have such experienced volunteers serving on the committee. Also, a very special thank you to Eddie Aho, who is still very involved in the actual operation of the computer.

Respectfully submitted,

Marilyn Somero, Chairman

Computer Study Committee

ANIMAL OFFICER'S REPORT

13 dogs returned to owners
11 loose horse complaints
14 dogs destroyed
12 stray cat complaints

SUPERINTENDENT'S REPORT
MASCENIC REGIONAL SCHOOL DISTRICT

I am pleased to submit my fourth report to the District for the 1986-87 school year.

The school year began with a student enrollment of 1,182 students, with 530 secondary students and 652 elementary students. This represented an overall decrease of 1 student from the previous year's enrollment.

Several new teachers joined the staff. At the elementary level, Deborah Bentley - grade 1, joined the Greenville staff. Mary Bralla - grade 2 and Karen Brigham - grade 2, joined the New Ipswich Central staff. Paula Dwyer - grade 5, and Gertrude Morgan - grade 5 joined the Appleton staff. Robin Frisch - grade 4, joined the Mason staff and Ellen Caravella transferred to New Ipswich Central - grade 1. Theresa Galley joined the elementary staff as physical education teacher and began a much-needed elementary physical education program. At the secondary level, the following teachers joined the high school faculty: Lorraine Chislett and Elizabeth Robblee - science, Martha Driskell - Home Economics, Gary Goldsmith and Ruth Ann Moyer - Social Studies, Gail Nord and Stanley Harrison - Guidance, Leif Nord and Margaret Sauvain - Special Education, Phil McMurray - Administrative Assistant, Gloria Tyler - Mathematics and Steven Riggs - Building Construction. In August, Michael Mezzocchi was appointed Associate Principal - Secondary, and in November, Paul Ralston was named District Principal.

During the school year, the District accomplished or pursued a number of goals. Under Steven Riggs leadership and planning, the Building Construction program was successfully reinstituted at Mascenic. The first house was completed by the students in June and sold in September. Construction of a second house is well underway this year. In its effort to attract and keep excellent teachers, the Mascenic School Board settled a three-year contract with Mascenic teachers which significantly raised teachers' salaries. The Board also established a joint teacher-administration-board committee to address staff needs and concerns. The administration established a Testing Review Committee to analyze the District's testing program. Curriculum projects in social studies and writing were completed. A number of projects and activities to heighten students' awareness and understanding of drug and alcohol abuse issues were initiated at the secondary level.

The second major goal, that of providing for Mascenic's facility needs, was addressed this past year with the completion of a program and facilities study by consultants from the University of New Hampshire. Three alternatives were developed in the study and presented at a public hearing in October. Those in attendance were nearly unanimous in selecting the solution alternative recommended by the consultants. The School Board has endorsed this alternative and will present a bond issue proposal at the March 1988 school district meeting which will meet the district's space needs until 1996.

Mascenic Regional School completed a very successful year in a number of areas. Academically, the Junior/Senior High Math Program was reviewed and a stronger curriculum implemented. Also, the Social Studies Department implemented an Advanced Placement Program for those students capable of achievement on that level. The school received two separate computer grants which have allowed for an increase in computer courses available to all students grade 7 through 12. A Home Base Program was implemented this fall to assist students having difficulty with both school attendance and academic achievement.

Guidance activities at Mascenic were extended to offer an SAT Prep Course as well as group counseling on coping with loss. Our 8th and 10th grade test scores saw a sharp increase as did our college level enrollment with 38% of the 1987 Senior Class attending a post secondary school.

The athletic teams at Mascenic continued to achieve success with last years volleyball, softball and baseball teams participating in the State Tournaments. Mascenic also entered teams for Granite State Challenge and the Academic Decathlon with plans to participate in the Jr. High Math Counts Program.

Students activities accelerated with the student council sponsoring a Thanksgiving Dinner as well as a Spring Brunch for Senior Citizens. The SADD organization sponsored a Drug Awareness Day and the National Honor Society sponsored an Achievement Night for those students who were successively on the Honor Roll.

The Music Department held a Christmas and Spring Concert and Career Assembly, and informational meetings were held for parents and students concerning employment, college and financial aid.

The voters at the 1987 school district meeting approved a budget of \$4,098,411. Marcia Ober was elected to a three year term as New Ipswich representative, replacing Earl Somero. Susan Rantamaki was elected to a two year term to fill the unexpired term of Carlene Gavin. Diane Beckman was appointed Greenville representative, replacing Thomas Welden. Matt Beckman was elected student representative to the Board. Corinne Hall was reappointed Treasurer and Lynne Way was reappointed School District Clerk. Bruce Hamilton was elected Chairman of the Mascenic School Board, and Arthur Godjikian, Co-Chairman.
